

Jahnavi Kantamaneni

Richardson, Texas; (469)-855-7959; jahnavi.kantamaneni@gmail.com; www.linkedin.com/in/k-jahnavi

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, PL/SQL

Data Analysis & Visualization: Data Cleaning, EDA, Power BI, Tableau, Matplotlib, Seaborn, Pandas

ML: Classification, Regression, Clustering, Feature Engineering, NLP, CV, LLMs, Gen AI, Agentic AI, RAG

Libraries: TensorFlow, PyTorch, Keras, Scikit-Learn, OpenCV, NLTK, spaCy, LangChain, OpenAI, Numpy

Big Data & Cloud: Spark, Hadoop, Kafka, Hive, Flink, HDFS, MapReduce, Databricks, AWS, Azure, GCP

Statistics: Statistical Analysis, Bayesian Statistics, Probabilistic Graphical Models, Probability, Linear Algebra

MLOps: Docker, Kubernetes, Kubeflow, MLflow, Terraform, Vertex AI, Jenkins, ELK, Prometheus, Grafana

PROFESSIONAL EXPERIENCE

Blue Yonder Inc., Coppell, TX

Full Stack Developer Intern (DevOps)

February 2025 – May 2025

- Developed an automation tool using Python and Vega-Lite to migrate dashboards from Grafana to Kibana, reducing migration time by over 70% and improving reliability
- Implemented full-stack observability for a high-traffic MongoDB workload on AKS using Prometheus and Grafana, ensuring seamless monitoring, rapid incident detection, and 99.99% uptime

ZS Associates Inc., South San Francisco, CA

Business Technology Solutions Associate Consultant Intern

June 2024 – August 2024

- Contributed to developing data products for multiple stakeholders leveraging my expertise in database design, data modeling, SQL, ETL and Cloud technologies (AWS S3, Athena, Redshift, Glue etc.,)
- Extracted actionable insights through in-depth Excel analysis to support informed decision making

Tata Consultancy Services Ltd. (Employer), Hyderabad, India

Software Developer (Systems Engineer)

July 2020 – June 2023

Apple Inc. (Contract)

- Designed & developed a highly scalable, automated solution using Python & AI/ML technologies, resulting in a 15 times performance improvement over the existing manual process
- Developed, deployed, and maintained over 20 ETL pipelines to support big data solutions, enabling seamless data migration to cloud-based data lake and data warehouse
- Received 'Special Achievement Award' and 'Arjuna Award' in recognition of my contributions

EDUCATION

The University of Texas at Dallas

Master of Science in Computer Science

May 2025

GPA 3.97/4.0

Vignan's University, Guntur, India

Bachelor of Technology, Computer Science and Engineering

June 2020

GPA 9.7/10

ACADEMIC PROJECT EXPERIENCE

Text-To-Speech enabled Image Captioning System

- Trained an Image Captioning model with Attention following an encoder-decoder architecture using CNN for image feature extraction and LSTM/GRU for caption generation
- Developed an application that has the potential to aid people with visual impairments utilizing the trained model, Python Flask, HTML, and Google's Text-to-Speech service

Selective Image Style Transfer Application

- Designed a Selective Image Style Transfer app using an encoder-decoder CNN with residual connections and pretrained segmentation models to stylize backgrounds
- Utilized PyTorch, Detectron2, OpenCV, PIL, NumPy, and scikit-image to implement image processing, segmentation, and deep learning techniques to enhance the efficiency and accuracy of style transfer
